Office of The Police Commissionerate, Jodhpur

F01/Cyber Crime/2025/

Date:-

The Secretary and commissioner,
Department of Information Technology & Communication,
Government of Rajasthan,
Jaipur.

Subject: Request for Development of a "Drug Abuse Rehabilitation Management Portal" for Commissionerate, Jodhpur.

Sir,

The Commissionerate Jodhpur is consistently working towards strengthening technology-driven preventive policing mechanisms, particularly in the areas of drug abuse control, high-risk individual monitoring, and rehabilitation-based interventions. Drug addiction has emerged as a key factor contributing to repeat offences, disturbed law and order, and vulnerability among youth. At present, the monitoring and rehabilitation process is scattered across multiple agencies, making it difficult to track individuals, review progress, or ensure coordinated intervention.

In view of this, the Commissionerate, Jodhpur proposes the development of an integrated digital platform titled "Drug Abuse Rehabilitation Management Portal". This portal aims to streamline the entire cycle of identification, referral, counselling, rehabilitation, relapse prevention, and community-based monitoring of individuals involved in drug abuse or substance dependency.

Proposed Key Features of the Portal:-

1. **Unified Digital Case Repository:-** Comprehensive profiles of drug-dependent individuals, including personal details, medical history (as allowed), police inputs, referral records, counselling notes, and rehabilitation progress.
2. **Automated Police Referral System:-** SHO, Circle Officers, and Special Units can digitally refer individuals for counselling, medical examination, or rehabilitation, ensuring transparent monitoring of each case.
3. **AI-Assisted Risk Categorization:-** The system can use pattern-based analytics to categorise individuals into low, moderate, or high-risk groups based on behaviour, field intelligence, and previous relapse history.
4. **Relapse Prediction & Alert Mechanism:-** Based on field entries, counsellor feedback, and risk scores, the portal will generate automatic alerts for high-risk individuals likely to relapse.
5. **Hotspot & Pattern Analysis Dashboard:-** GIS-enabled mapping to identify drug hotspots, vulnerable areas, peddling patterns, and repeat offender clusters for strategic and targeted police action.
6. **Integration with NGOs, Rehab Centres & Counsellors:-** A dedicated interface for external stakeholders to update follow-up sessions, treatment progress, relapse notes, and case closure status.
7. **Real-Time Monitoring Panel for Senior Officers:-** CP, DCP, ADCP and ACP level dashboards showing pending cases, active referrals, progress charts, geographic patterns, and intervention outcomes.
8. **Confidential, Secure & Role-Based Access System:-** Strong data protection protocols with encryption, segregated user roles, audit trails, and adherence to privacy guidelines ensuring sensitive personal information remains secure.

Expected Benefits for the Police Department :

- Significant reduction in drug-related repeat offences through continuous monitoring and timely intervention.
- Improved preventive policing by identifying trends, hotspots, and behavioural triggers among vulnerable individuals.
- Strengthened coordination between Police, NGOs, counsellors, health institutions, and rehabilitation centres on a single digital platform.
- Better accountability and transparency due to structured digital records, automated workflows, and systematic follow-ups.
- Enhanced community safety by reducing drug-linked violence, thefts, and public nuisance cases.
- Efficient utilization of police manpower with real-time data, reducing manual case tracking and paperwork.
- Creation of a long-term database supporting evidence-based policing and future policy formulation.

Regarding this, Considering the importance and urgency of establishing a unified and technology-driven system for managing drug rehabilitation and relapse prevention at the Commissionerate level, it is requested that may kindly assign a dedicated developer team to design, develop, and operationalize the Drug Abuse Rehabilitation Management Portal at the earliest. For smooth coordination, technical discussions, requirement gathering and day-to-day communication with the development team, the following Nodal Officer is hereby nominated:

Name	:	Panna Ram Bheel
Designation	:	ACP (Dy. Director)
Mobile	:	9828332828
Email	:	prbheel.doit@rajasthan.gov.in
Office Address	:	Office of the Commissioner of Police, Near Rotary Circle Jodhpur

The Nodal Officer will coordinate with developer team, provide functional requirements, validate module designs, and ensure timely feedback until completion of the project.

This initiative will play a crucial role in strengthening policing efficiency, reducing drug-linked criminal behaviour, and promoting a rehabilitation-oriented approach in the Commissionerate.

You are requested to kindly consider this proposal favourably and facilitate the assignment of a developer to this project free of cost.

(Om Prakash)
Police Commissioner
Jodhpur
